

448K+20K RET CET

The RET CET uses a 20KHz frequency to deliver 448KHz energy deep into the body. This technology provides an internal heating effect, with the high-frequency energy reaching up to 448,000 cycles per second. It penetrates subcutaneous tissue to depths of 8-15cm, raising body temperature to 38.5-42°C. This heat activates the immune system, helping to reduce subcutaneous and visceral fat.

-  Lipid management
-  Body Slimming
-  Balance cell

Specification

Technology	RET+CET+RF+Facial Massage
Power	550W
Operation Interface	7 Screen
Power Supply	AC 220-230V 50/60Hz
Packing Size	51*51*39cm
Gross Weight	25kg

Model - RF355

Working Heads

RET (Resistive Electric Transfer)

Triple RF Roller Massage Head

CET (Capacitive Electric Transfer)

Preheatable Negative Plate

Fascia Handle

Advantages

- **High Power Output**
Delivers quick, noticeable results with up to 550W of actual power.
- **Versatile Treatment Heads**
Equipped with specialized heads for different body areas, enhancing treatment convenience.
- **Real-Time Temperature Control**
Monitors body temperature throughout the treatment, with an alarm for safety.
